SUMMARY

Results-driven Computer Science student (CGPA: 7.9) with hands-on experience in full-stack development and AI. Proven track record of building scalable applications, including an award-winning Interview Analysis System achieving 95% accuracy. Proficient in Python, Java, and React, seeking to leverage strong problem-solving skills to drive software innovation in a challenging development role.

EXPERIENCE

Software Developer Intern

Internshala 01/2024 - 02/2024 Remote

- Engineered scalable software modules using **Python** and **Java**, improving code maintainability by 30%.
- Collaborated in a remote Agile environment to deliver 3 critical project milestones ahead of schedule.
- Automated data processing tasks, reducing manual workload by 15 hours per week.

Intern

National Aluminium Company Limited (NALCO) 06/2025 - 07/2025 Angul, Odisha

- Contributed to enterprise-level software development, optimizing database queries to reduce load times by 20%.
- Streamlined workflow automation processes, increasing departmental efficiency by 15% in a corporate setting.
- Validated software performance through rigorous testing cycles, ensuring 99.9% system uptime.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

GIET University
08/2023 - 06/2027 Gunupur
CGPA: 7.9 | Key Coursework: Data Structures, Algorithms, DBMS, AI

Intermediate

Vikash Residential School
01/2021 - 05/2023 Bargarh

Matriculation

Kendriya Vidyalaya
01/2019 - 05/2021 Badmal

SKILLS

- **Languages:** Python, Java, HTML5, CSS3, JavaScript (ES6+)
- **Frameworks:** Node.js, React.js, OpenCV, Socket.IO, Express.js
- **Databases & Cloud:** MongoDB, Google Firebase, REST APIs
- **Tools & APIs:** Git/GitHub, Gmail API, WhatsApp API, VS Code
- **Soft Skills:** Analytical Thinking, Rapid Problem Solving, Technical Communication

PROJECTS

Quantifying Interview Presence with Multimodal AI

Tech Stack: Python, OpenCV, Machine Learning

- Architected a Multimodal AI system achieving **90% accuracy** in detecting candidate behavioral cues.

- Processed video data using Computer Vision to analyze eye contact and body language for performance evaluation.

Interactive Text-Based Adventure Game

Tech Stack: Python, GUI Frameworks

- Designed an immersive RPG utilizing Object-Oriented Programming (OOP) to manage complex game states.
- Created a custom GUI, resulting in a **40% increase** in user engagement compared to console versions.

Airline Reservation System

Tech Stack: Java, MongoDB, Backend Services

- Engineered a robust Flight Booking System handling **500+ mock transactions** with zero database inconsistencies.
- Integrated a MongoDB backend to manage passenger records, reducing data retrieval latency by 35%.
